**TECHNICALLY BEAUTIFUL BRACES™**

## RADIANCE PLUS IS CONFIDENCE PLUS

Whether your orthodontic needs are common or complex, you want an effective yet attractive solution that also accommodates your on-the-go lifestyle. The unparalleled clarity and performance of Radiance Plus creates a confident and stunning smile both during and after treatment.

Radiance Plus is a durable, stain resistant, around-the-clock solution to straighten your teeth, freeing you to focus on your new smile and not on the process.

## THE BENEFITS ARE CLEAR

Radiance Plus is trusted by orthodontists worldwide and recommended for patients of all ages for many reasons. You will enjoy the smooth, low profile comfort and industry leading clarity\* while the strength, durability and easy application of Radiance Plus gives your orthodontist the control to most effectively deliver your ideal smile.

### BEAUTY

Radiance Plus is proven to be the clearest of all ceramic brackets. They are made from pure grown sapphire, the same crystal clear material used for the aesthetic look and protection of most smart devices. The body of the braces also resists stains so Radiance Plus will stay brilliant throughout treatment.

### PERFORMANCE

Radiance Plus braces are designed to help straighten your teeth quickly and effectively, without the concern of any removable items to lose and replace. Once on your teeth, the patented Quad Matte™ base keeps them on with unparalleled strength.

### STRENGTH

Each Radiance Plus ceramic bracket is designed for durability and heat polished to provide a smooth, comfortable surface. The contoured design helps keep Radiance Plus clean and hygienic throughout treatment, while providing the strength to deliver exceptional results.

\*Lopes Filho, Hibernon, et al., 2012. Influence of optical properties of esthetic brackets (color, translucence, and fluorescence) on visual perception. American Journal of Orthodontics & Dentofacial Orthopedics. April 2012. 141(4): 460-467.

## BRILLIANT CHOICE FOR A BRILLIANT SMILE

Radiance Plus offers aesthetic flexibility for patients of all ages. For young adults, imagine the translucence of clear brackets for senior pictures and then adding colored ligatures or elastics to show off during School Spirit week. At the same time, parents protect their investment with Radiance Plus since there are no pieces to remove, lose, or replace which may increase treatment times.

The combination of beauty, strength, comfort, and worry-free performance creates incomparable value in a complete orthodontic package. Talk with your orthodontist about which option is right for you.
